

In accordance with the compliance with the European Radio Equipment Directive (RED), which came into effect in August 2025, it is necessary to upgrade the firmware and user application of each model.

The combinations of firmware and user applications before and after RED support are as follows.

Application	Model Firm・Tool Ver.	SQE2/CQE2		WPS2	
		V7.225.0.0 or later	V7.218.4.0 before	1.18563.622 or later	1.18563.605 before
Multi Monitoring & Control Software	4.0.18 or later	✓	✓	-	-
	4.0.16 or before	*2	✓	-	-
Content Management Software	4.0.2 or later	*1	○	-	-
PressIT for iOS	1.0.2 or later			✓	✓
PressIT for Android	0.0.19 or later			✓	✓

*1: Set [Command Protect] to [Enabled (MD5)]. Use VSS2.0 after the VSS2.0 release.

*2: Use the latest application. If the version listed in the table has not been released, set [Command Protect] in the console's settings to [Enabled (MD5)].
