Thank you for purchasing this Panasonic product.

- To ensure correct use of this lens, please read the operating instructions supplied with the lens and the projector carefully.
- **Before using this product, be sure to read “Read this first!” (➡Page 3 to 5).**
- Please save this manual for future use.

Projected image size and Projection distance	Appendix / Annexe / 付録 1

The “Appendix” can be found after the Japanese language section ().

WARNING:

Do not look at or place your skin into the light emitted from the lens while the projector is being used.

Doing so can cause burns or loss of sight.

- Strong light is emitted from the projector's lens. Do not look at or place your hands directly into this light.
- Turn off the power when moving away from the projection lens or projector.

Do not project an image with the lens cover attached.

- Doing so can cause fire.

CAUTION:

Before replacing the projection lens, be sure to turn off the power and disconnect the power plug from the wall outlet.

- Unexpected projection of light may cause injury to eyes.
- Replacing the projection lens without removing the power plug may result in electric shock.

Do not stand in front of the lens while the projector is being used.

Doing so can cause damage and burns to clothing.

- Strong light is emitted from the projector's lens.

Do not place objects in front of the lens while the projector is being used.

Doing so can cause fire, damage to the object, or malfunction of the lens and projector.

- Strong light is emitted from the projector's lens.

Do not open the desiccant bag. Do not eat the contents.

Inadvertently ingesting desiccant could be harmful.

- If the desiccant gets into your eyes or mouth, immediately rinse with plenty of water and seek medical attention.
- Keep desiccant out of the reach of children.

Read this first! (continued)

■ Hazard distance (IEC 62471-5:2015)

The distance from the projection lens surface, at which the emission reaches the Accessible Emission Limit (AEL) of RG2 (risk group 2), is known as the hazard distance (HD) or safety distance. The area where the emission exceeds the Accessible Emission Limit of RG2 is called the hazard zone (HZ).

Within the hazard zone, never look into the light projected from the projector. The eyes may be damaged by direct irradiation even if you look at the light just for a moment. If you are outside the hazard zone, it is considered to be safe in all circumstances except deliberately staring into the light projected from the projector.

■ Risk group

The combination of the projector and the projection lens is categorized as RG2 when the hazard distance is 1 m (39-3/8") or less. It is categorized as RG3 (risk group 3) when the hazard distance exceeds 1 m (39-3/8"), and it will be for commercial use instead of consumer use.

In case of RG3, there is a possibility of damaging the eyes by direct irradiation when looking into the projection light from inside the hazard zone even for a moment.

In the case of RG2, safe use without damaging the eyes is possible in all circumstances except deliberately staring into the light projected from the projector.

Combinations with any projection lens are categorized as RG3 for this projector.

Each dimension inside the hazard zone for combination with projection lens which the hazard distance exceeds 1 m (39-3/8") is as follows.

Projector model	Risk group
PT-REQ15 / PT-REQ12 / PT-REQ10 / PT-REQ80 / PT-REZ15 / PT-REZ12 / PT-REZ10 / PT-REZ80	RG3

Read this first! (continued)

Furthermore, each dimension to indicate the hazard area (Hz) for a combination with a projection lens that has a hazard distance exceeding 1 m (39-3/8") is as follows.

(Unit: m)

Projector model	HD*1	D1*2	D2*2	D3*2	D4*2
PT-REQ15 / PT-REZ15	6.15	0.39	0.39	0.442	0.442
PT-REQ12 / PT-REZ12	5.19	0.325	0.325	0.373	0.373
PT-REQ10 / PT-REQ80 / PT-REZ10 / PT-REZ80	3.99	0.25	0.25	0.287	0.287

*1 HD: Hazard distance

*2 The values of D1 to D4 will change in accordance with the lens shift amount. Each value in the table is the maximum value.

Note

- The values in the table are based on IEC 62471-5:2015.
- The projectors compatible with each projection lens may be added or changed without notice. For the latest information, refer to the following website.
<https://docs.connect.panasonic.com/projector>

Attention

- If the light projected from the projector directly enters the eyes while you are inside the hazard zone, the retinas may be damaged. Do not enter the hazard zone during use. Alternatively, install the projector in a location where the projected light will not directly enter the eyes.

Before Use

■ Supported projectors

PT-REQ15 / PT-REQ12 / PT-REQ10 / PT-REQ80 / PT-REZ15 / PT-REZ12 / PT-REZ10 / PT-REZ80

Note

- This manual omits the alphabets at the end of projector model numbers.
- Models other than the above may also be supported. Refer to the operating instructions for your projector or the following website.
<https://docs.connect.panasonic.com/projector>

■ Supplied Accessories

Make sure that the following has been provided.

Part name	Appearance (quantity)
Lens cover	 ● The product is delivered with lens covers attached. ● The shape and size of the lens covers are different for each product. 1 each for front and rear

Preparation

Before replacing the projection lens

Return the projection lens to the home position before replacing or removing it. For details on how to return the lens to the home position, refer to the operating instructions of the projector.

Attention

- Make sure that the projector power supply is switched off before attaching or detaching the projection lens.
- After removing the projection lens, store it safely away from vibration or impacts.
- Do not touch the electric contact points of the projection lens with your fingers. Dust and dirt on the contacts may cause contact malfunctions, while static electricity may damage the unit.
- Do not turn the gear (ring) part of the projection lens barrel by hand. Doing so may damage the motor.
- Do not touch the surface of the lens with bare hands. Finger prints and dirt on the surface of the lens will be magnified by the lens and lower the quality of the projected image. Place the supplied lens cover on the zoom lens when the projector is not in use.
- The lens may become damaged by hitting with a hard object or by wiping the front surface of the lens with excessive force. Handle with care.
- Use a clean, soft and dry cloth to wipe away dust and dirt from the projection lens. Do not use fluffy cloths containing oil, water or dust for cleaning. The lens is easily damaged, so do not apply excessive pressure when wiping it.

Preparation (continued)

Attaching the Lens

Attention

- Before attaching the Projection Lens, remove the two lens covers attached to the Projection Lens.

The illustrations in this procedure depict use of the PT-REQ15 as an example.

- 1) **Align the protrusion mark on the projection lens with the protrusion mark on the main unit and insert it all the way (Fig. 1).**
 - Take care when inserting the lens not to damage the connector.
- 2) **Turn the projection lens clockwise (Fig. 2).**
 - If you turn the projection lens until it clicks into place, it will not come out even if turned counterclockwise. After turning the projection lens clockwise, turn it counterclockwise to confirm that it does not come out.

Fig. 1

Fig. 2

Detaching the Lens

The illustrations in this procedure depict use of the PT-REQ15 as an example.

- 1) **While pressing the lens release button (i), turn the projection lens counterclockwise as far as it will go (ii) and then detach the projection lens (iii).**

Projection relationships

The dimensional relationship between the screen and the projector is shown below.

■ Dimensional relationship diagram

Note

- This diagram assumes that the size and position of the projected image will be adjusted so that the image fills the entire screen.
- This illustration is not drawn to scale.

L	Projection distance		H	Distance from the lens center to the lower edge of the projected image
LW	Minimum distance	SH		Projected image height
LT	Maximum distance	SW		Projected image width
L1	Lens protrusion dimension		SD	Projected image size

● Dimension for L1 (approximate values)

(Unit: m)

Projector model	Dimension for L1 (approximate values)
PT-REQ15 / PT-REQ12 / PT-REQ10 / PT-REQ80 / PT-REZ15 / PT-REZ12 / PT-REZ10 / PT-REZ80	0.165

Note

- The illustrations of projectors in this manual are for informational purposes only and do not represent a specific projector model. Configurations may vary with the model.

Attention

- To prevent obstruction of the intake and exhaust vents, install the projector with a clearance from walls and objects. For details about the required distance from surrounding walls and objects, refer to the operating instructions for your projector.
If you are installing the projector in a sealed space, be sure to provide additional air conditioning equipment and ventilation equipment. Insufficient ventilation will result in an accumulation of heat and may activate the projector's protection circuit.
- Avoid setting up in places which are subject to sudden temperature changes, such as near an air conditioner or lighting equipment (studio lamps, etc.).

Projection relationships (continued)

■ Dimensional relationship

For details on the projection distance (L), refer to “Projected image size and Projection distance” and “Projection distance formulas” in the Appendix.

Note

- For details on “Projected image size and Projection distance” for projector models other than the following, refer to “Setting up” in the operating instructions of the projector.

PT-REQ15 / PT-REQ12 / PT-REQ10 / PT-REQ80 / PT-REZ15 / PT-REZ12 / PT-REZ10 / PT-REZ80

■ [GEOMETRY] projection range

[VERTICAL KEYSTONE] (viewed from the side)	[HORIZONTAL KEYSTONE] (viewed from above)
	
Vertical arc correction (viewed from the side)	Horizontal arc correction (viewed from above)
 L2: Projection distance R2: Arc radius	 L2: Projection distance R2: Arc radius
 L3: Projection distance R3: Arc radius	 L3: Projection distance R3: Arc radius

Projection relationships (continued)

Projector model	Only [KEYSTONE] used*1		[KEYSTONE] and [CURVED CORRECTION] used together				Only [CURVED CORRECTION] used	
	Vertical keystone correction angle α (°)	Horizontal keystone correction angle β (°)	Vertical keystone correction angle α (°)	Horizontal keystone correction angle β (°)	Min. value of R2/L2	Min. value of R3/L3	Min. value of R2/L2	Min. value of R3/L3
PT-REQ15 / PT-REQ12 / PT-REQ10 / PT-REQ80 / PT-REZ15 / PT-REZ12 / PT-REZ10 / PT-REZ80	±45	±40	±20	±15	0.2	0.4	0.2	0.3

*1 When [VERTICAL KEYSTONE] and [HORIZONTAL KEYSTONE] are used simultaneously, correction cannot be made exceeding total of 55°.

Note

- When [GEOMETRY] is used, the focus of the entire screen may be lost as correction increases.
- Make the curved screen a circular arc shape with one part of a perfect circle removed.
- Adjustment range of the [GEOMETRY] items may not match the listed projection range depending on the projection lens. Use this projector within the projection range, otherwise the correction may not work.

Lens shift ranges

Perform the lens position shift within the adjustment range.

Perform lens shift adjustment within the ranges shown in the following illustrations.

The focus may change when the lens position is shifted out of the adjustment range.

This is because the movement of the lens is restricted to protect the optical parts.

Projection position can be adjusted with the optical axis shift based on the home position in the respective range.

PT-REQ15 / PT-REQ12 / PT-REQ10 /
PT-REQ80 / PT-REZ15 / PT-REZ12 /
PT-REZ10 / PT-REZ80

Note

- The home position of the projector is a point of origin position for the lens shift (i.e., vertical and horizontal positions of the lens) based on the results of lens calibration. It is not the optical center position of the screen.

Specifications

F Number	1.94 - 2.36
Focal Length (f)	114.3 mm (4-1/2") - 194.2 mm (7-21/32")
Dimensions	Width 135 mm (5-5/16") Height 148 mm (5-13/16") Depth 259 mm (10-3/16")
Net Weight	Approx. 2.65 kg (5.8 lb)

Disposal of Old Equipment

Only for European Union and countries with recycling systems

This symbol on the products, packaging, and/or accompanying documents means that used electrical and electronic products must not be mixed with general household waste. For proper treatment, recovery and recycling of old products, please take them to applicable collection points in accordance with your national legislation.

By disposing of them correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment.

For more information about collection and recycling, please contact your local authority.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

Product Information (for Turkey only)

AEEE Yönetmeliğine Uygundur.

Environment care information for users in China

Note

- A $\pm 5\%$ error in listed projection distances may occur.
When [GEOMETRY] is used, distance is corrected to become smaller than the specified image size.
- The throw ratio is based on the value during projection with the projected image size of 2.54 m (100").

Remarque

- Une erreur de $\pm 5\%$ dans des distances de projection énumérées peut se produire.
Lorsque [GÉOMÉTRIE] est utilisé, la distance est corrigée pour devenir inférieure à la taille d'image spécifiée.
- Le rapport de projection est basé sur la valeur en cours de projection avec une taille de l'image projetée de 2,54 m (100").

お知らせ

- 記載の投写距離は $\pm 5\%$ の誤差が発生します。
また、[幾何学歪補正] 使用時は、所定の画面サイズよりも小さくなる方向で補正されます。
- スローレシオは、投写画面サイズ 100 型投写時の値を基準にしています。

Setting-up dimensions which are not given in the above table can be calculated using the formulas below. Check the projected image size SD (m) and use the following formula to determine projection distance (L).

La configuration des dimensions qui ne sont pas données dans le tableau ci-dessus peut être calculée à l'aide des formules suivantes. Vérifiez la taille de l'image projetée SD (m) et utilisez la formule suivante pour déterminer la distance de projection (L).

上記の表以外の投写寸法は次の計算式で求めることができます。投写画面サイズ SD (m) をご確認のうえ、それぞれの計算式で投写距離 (L) を求めてください。

- Projection distance formulas
- Formules de distance de projection
- 投写距離計算式

Values obtained by the following calculation formulae contain a slight error.

Periods are used to represent decimal points in the calculation formulas in the following table.

Les valeurs obtenues par les formules de calcul suivantes contiennent une légère erreur.

Les points sont utilisés pour indiquer les décimales dans les formules de calcul dans le tableau suivant.

下記の計算式で求められる値には、若干の誤差があります。

(Unit / Unités / 単位 : m)

	L	
	LW	LT
When the screen aspect ratio is 16:10 Lorsque le rapport d'aspect de l'écran est 16:10 画面アスペクト比 16 : 10 のとき	$=5.3867 \times SD + 0.2939$	$=9.3177 \times SD + 0.2899$
When the screen aspect ratio is 16:9 Lorsque le rapport d'aspect de l'écran est 16:9 画面アスペクト比 16 : 9 のとき	$=5.5365 \times SD + 0.2939$	$=9.5767 \times SD + 0.2899$
When the screen aspect ratio is 4:3 Lorsque le rapport d'aspect de l'écran est 4:3 画面アスペクト比 4 : 3 のとき	$=5.6905 \times SD + 0.2939$	$=9.8430 \times SD + 0.2899$
When the screen aspect ratio is 21:9 Lorsque le rapport d'aspect de l'écran est 21:9 画面アスペクト比 21 : 9 のとき	$=5.8528 \times SD + 0.2939$	$=10.1238 \times SD + 0.2899$
